

# EEX TRANSPARENCY API

**EEX supports your decisions or, at least, decision-making in the European power markets with fundamental information:**

- › Master data on companies, facilities as well as generation, storage and consumption units for 16 countries
- › Urgent Market Messages (UMMs) straight from the source in real time
- › Time series data including long-term available capacity, generation forecasts, actual generation per source and unit

## YOUR BENEFITS:

**Easy and efficient integration via REST API**

**1,000+ UMMs every day**

**Data provided directly by 150+ reporting companies**

**Unique capacity and outage data from 1 MW**

### The service you get:

- › The most recent available fundamental data in Europe to fine-tune your trading strategy
- › High availability and easy connectivity via the EEX Group Transparency API
- › Comprehensive documentation and customer support

### The data you get from Transparency API:

- › Real-time updates on actual generation, outages and available capacity in the major European electricity markets
- › Wind and Solar forecasts based on a multi-model methodology with data from ECMWF, ICON, UKMET and GFS (provided by our partner EuroWind)
- › Full access to historical data from 2009 onwards
